

B-16

16mm black mobile LED display

Key Benefits

- High-quality black LED screen
- 16:9 aspect ratio
- Total display solution
- Ready to operate in 15 minutes
- Flexible and independent
- Cost-effective

Barco's B-16 is the first black mobile LED display on the market and offers a cost-effective total display solution. The high quality LED display comes in a fully equipped trailer, which makes it possible to show your message at any time and place, with a minimal set-up time.

The B-16 LED display is built with T-16BK tiles, Barco's new 16 mm black outdoor LED solution. The T-16BK delivers high-resolution full color images with extreme brightness levels. But the key feature that makes the T-16BK really unique is a specially designed black lamp LED. This black lamp LED offers vastly improved contrast levels, unseen for any 16mm LED display on the market today.

In addition, the B-16 is very easy to operate, which reduces your cost of ownership immensely. The LED display comes in a trailer that can be pulled by a vehicle with a 3,500 kg towing capacity, so all electronics are stored properly and compact when traveling. The display can easily be set up by means of a simple lever-control. This way, the B-16 is ready to operate in 15 minutes.
